

HOW TO ACHIEVE COST SAVINGS THROUGH AQUACYCL'S WASTEWATER TREATMENT

Four ways you improve your bottom line and achieve up to 60% cost savings on your wastewater treatment with Aquacycl.

Are you spending too much on wastewater?

Chances are, you probably are. The reality is that wastewater doesn't have to be just the cost of doing business. Unnecessary sewer surcharges, fines for non-compliance, hauling costs, and business risks can all be avoided through effective wastewater management.

While it's true that wastewater can have a negative impact on your bottom line...

...it also presents a great opportunity to improve it if managed correctly.

4 Cost-Saving Benefits:

1. Avoid out of compliance fines
2. Resource recovery and reuse
3. Improve operational efficiency
4. Enhance corporate image

But how do you actually achieve this?

Onsite Pretreatment Can Save Big Bucks

Case Study: PepsiCo's Operational Savings

With onsite pretreatment of their high-strength waste stream, PepsiCo achieved:

- 22% monthly cost savings
- Removal of 474k lbs BOD
- >1k tons of CO2e mitigated
- 40k kWh energy savings for the city
- Cost predictability
- Improved relationship with utility

An onsite pretreatment system will help you lower the organic load of your process water and reduce the variability in your discharge

Eliminate Offsite Hauling

Reduce spillage risks, GHG emissions, costs, and third party coordination.

Guarantee Compliance

Eliminate out-of-compliance fines, legal risks, and sewage surcharges.

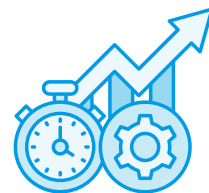

Reduce Energy Expenditure

Enable energy-neutral wastewater treatment to reduce Scope 2 emissions and your energy bill.

Handle Production Variability

Effectively handle variability in production to eliminate production shutdown risks.

20-60%

Cost Savings

90%

GHG Mitigation

100%

Hassle Free

SLASH WASTEWATER COSTS

- Eliminating the need for external hauling and sewage surcharges.
- Enjoy a hassle-free experience with our hands-off system.
- Benefit from an efficient onsite treatment facility without a CapEx investment.
- Ensure a seamless wastewater treatment process managed by our expert team.
