Tailored Solutions for Natural and Artificial Sausage Casing Production

We're here to help you address costs, risks, and environmental concerns with your wastewater no matter the meat sausage casing you produce:

- **Natural:** Treat high organic loads, protein, and odors from variable hog, cattle, or sheep natural casings without dilution.
- **Collagen:** Remove residual collagen, tanning chemicals, and smoke flavoring from wastewater effectively.
- **Fibrous:** Separate cellulose fibers, remove curing agents and additives, and reduce odors to maintain compliance.

THE BETT® SYSTEM

Organics removal

- Treat high organic loads (COD/BOD) and suspended solids (TSS) onsite
- Maintain compliance under changing conditions
- Reduce costs and risks
- Achieve water-use and emissions targets

SULFIDEFIX

H₂S removal

- Remove 99.9% of H₂S gas from wastewater tanks
- Reduce odors
- Prevent corrosion
- Improve the safety of your facility
